Animal Care Trust Fund Sub-Committee Reimbursement Qualification Checklist

PERSON/ RESCUE PARTNER REQUESTING REIMBURSEMENT:

NAME: _____

Meeting Date: _____ 2025

Checklist

- Trust Fund Rules send
Copy of all invoices marked PAID
MEDICAL HISTORY from your vet, where your animal was treated, INCLUDING ALL RESULTS
Completed CHRONOLOGICAL TIMELINE HISTORY form
AFFIDAVIT – letter stating that you have not received any money (including donations) from 3rd parties to pay for your bills (SIGNED and Notarized)
Any additional pictures or proof that could help your claim

PLEASE CHECK-MARK ALL APPLICABLE BOXES

Emergency Reimbursement

- Director or Committee Authorization
Veterinarian statement received
Funds available

Post-Adoption or Rescue-Pull Reimbursement

- Adopted/Rescued from shelter
Adoption within 30 days of reimbursement request
Medical or surgical in nature
Could not be dealt with adequately by County Veterinarian
Written request received indicating why owner/rescue group cannot afford to pay expenses
Treatment is not the result of apparent abuse or neglect by the owner/rescue group

Financial Need Reimbursement

- Sterilized or agrees to sterilize animal
Has rabies vaccine and license or agrees to have vaccinated and licensed
Written request received indicating why owner cannot afford to pay expenses
Funds available

Extraordinary Shelter Expenses

- Director Authorization
Services not provided by County Animal Clinic
Funds available

Total Amount of charges: \$_____

Funds available: _____

Re: Animal Care Advisory Committee Trust Fund Sub-Committee Reimbursement Request

Dear Sir or Madam;

Thank you for contacting The Animal Care Advisory Committee Trust Fund Sub-Committee.

Attached please find the information requested to present your case to the Animal Care Advisory Committee – Trust Fund Sub-Committee:

1. Trust Fund Rules
2. Please provide a copy of **all invoices** marked **paid**
3. Please provide the **Medical history** from your vet where your animal was treated, **including test results**
4. Completed **Chronological History Timeline** (form attached)
5. **An affidavit, signed and notarized**, stating that you have not received any money (**including donations**) from a 3rd party to pay for these bills (attached)
6. Any additional pictures or proof that could help your claim

Please send all documentation to me via e-mail.

If you have any additional questions, please don't hesitate to contact me.

Sincerely,

Animal Care Division

AFFIDAVIT
Please Have Notarized

NAME:	Yumay Yanes
Address:	2305 North 37 Avenue; Hollywood FL 33021

Meet Cora....

Cora resting under her tunnel after swatting her pig toy around and playing with her kick stick.

1/18/25

Dear Committee Members,

I'd like to thank you for taking the time to review Cora's case and considering her as a possible recipient of the Trust Fund. I trapped Cora on 3/16/2022 and she was pregnant. Cora safely delivered her babies on 3/24/2022. I was able to find a rescue group who found homes for her babies, and I kept Cora.

During a health check with her primary vet, it was believed she had a condition called stomatitis. Cora was seen by a couple of specialists who agreed she should start a daily treatment of prednisolone. She was doing relatively well until late 12/2022 when I noticed she began eating less of her food. As a result, I scheduled a follow-up appointment with Dr. McMorrان (dentist) at Hometown Animal Hospital. During the follow-up appointment, on 2/13/2023, Dr. McMorrان reported advanced periodontitis (even while taking medication), and she discussed possible treatment options to include the pros and cons for each. She ultimately felt it was in Cora's best interest to complete a total teeth extraction procedure, based on the current state of her gums and teeth, age, and medical history. I consulted with Cora's other vets who felt it was the best course of action. I was nervous about moving forward with the procedure but understood why it was the best course of action.

Currently, she shows signs of being a happier kitty. She is playful, more affectionate, and is more present. Racing through her tunnel at full speed, playing with her kick stick, chasing her tail, and swatting her small catnip toys across the floor are her favorite things to do. I am pleased to say that since the procedure in 2/14/2023, she has not taken a single dose of prednisolone. Of great shock to me, she prefers to eat dry food over wet food. Imagine that! I always put out wet and dry food and she consistently prefers the dry food. Also, she was spayed without any complications and didn't even need to wear an E-collar.

I will conclude by sharing two things: 1. We affectionately refer to her as *mama*. Since her teeth extraction procedure, we now affectionately refer to her as *gran-mama*. 2. I have a neighbor who has shared that when he passes, he wants to come back as one of my cats due to my dedication to their health. Thank you for taking the time to consider us for the trust fund.

With much appreciation,

Yumay, Todd, and Cora

03-09-23 WLIST\$ By: RYM, Referrals - Call to Schedule
O called to see about scheduling a spay(?) - please call AMP: 03-04-23 at 9:38a:

Spoke to owner she mentioned to me that EKM offered to spay pet the day of the dental but because the pet was on prednisone and in heat that decided to wait, now that she finished her heat cycle wanted to do it her primary only had an opening in april for spay but owners wanted it to do before she goes back on heat i told them we dont have anything before april either and pet has to be spay by primary, we only took care of the mouth even tho EKM offered to do it the day of the dental but we are not suppose to do anything besides dental care to her pet since thats what she was referred to us originally for if we didnt performed the spay during the dental them unfortunate we cannot schedule it-RYM: 03-09-23 at 11:07a:

Owner called again t ask if one of the other doctors on staff here could do the spay. I explained we wont be able to do any services that their primary vet can perform for them. TAF: 03-09-23 at 4:21p:

HOMETOWN ANIMAL HOSPITAL
& ALL PETS DENTAL

“Cora” Yanes/Malcomson

Date: 02-13-23

DISCHARGE INSTRUCTIONS

Oral Health

Hometown Animal Hospital and All Pet's Dental
17100 Royal Palm Blvd.
Weston, FL 33326
954-349-5800

02/13/2023

To Cora's caregivers,

You're doing a great job caring for Cora. Your veterinary team at Hometown Animal Hospital and All Pet's Dental will continue to support you as you manage her dental health. Keeping her mouth healthy is an important step in helping her to live a happy and healthy life.

Dr. Elizabeth McMorran wanted to share this important information with you concerning Cora's visit today.

Cora had the following treatments performed today:

- A detailed oral exam under anesthesia
- X-rays of her teeth
- A thorough teeth cleaning above and below the gumline
- Full mouth extractions - Please see dental chart

Extractions

The results of this treatment revealed that extractions were needed.

- 29 extractions were needed today to decrease pain and infection in her mouth.
- A local anesthetic was used to numb Cora's mouth so she would wake up more comfortably.
- The following teeth were removed: 101, 102, 103, 104, 107, 108, 109, 201, 202, 203, 204, 206, 207, 208, 209, 301, 302, 303, 304, 307, 308, 309, 401, 402, 403, 404, 407, 408, 409

Extraction Instructions:

- You may notice a small amount of blood in her saliva for the next few days, especially when eating or drinking. If it seems excessive, please call us.
- The sutures in the mouth will dissolve in 3-4 week(s)
- Do not lift her lip to look at the incision as this may pull out the sutures.

Anesthesia

Cora did well under anesthesia and woke up smoothly.

- Since anesthesia can decrease tear production, an ointment was placed in her eye to protect them while she was asleep. This oily residue will dissipate over the next few days.
- Because of the anesthesia, she may be sleepy and wobbly for the next 1-2 hours. However, some pets have the opposite effect and seem more agitated or whiny.

An IV catheter was placed to administer IV fluids, anesthesia and other medications.

Food and Water

Feeding Instructions:

- Feed soft food for the next 5 days.
- To avoid nausea, do not offer food immediately upon arriving home. Feed about half of the usual amount after arriving home if she seems hungry.
- Some pets have a decreased appetite for 1-2 days following surgery.

Water Restrictions:

- Cora can have normal access to water.

Activity

- Please limit access to stairs and jumping on furniture while she recovers from anesthesia.
- Monitor her outside.
- Do not play tug-of-war for 2 week(s).

Medication

Dr. Elizabeth McMorran prescribed the following for Cora:

- Pain medication to keep Cora comfortable after her procedure.
 - Cora was given an injection to decrease her pain which will last for 72 hours.
- * Cerenia injection * Depo-Medrol injection 20mg/ml * Buprenorphine injection 72hr 1mg/ml

Home Care

Seek immediate veterinary care if Cora...

- Has excessive bleeding from the mouth
- Seems agitated or uncomfortable for more than 2 hours
- Has difficulty breathing
- Begins squinting her eyes for more than 1 hour at a time
- Refuses to eat or drink for more than 12 hours
- Does not defecate for more than 48 hours
- Has diarrhea for more than 12 hours
- Vomits more than three times in 12 hours
- Begins bumping into objects

- Has difficulty walking or jumping

If we are not available and you need help, please contact LeadER Animal Specialty Hospital at 954-437-9630.

Recheck

Please recheck with Dr. Elizabeth McMorran in 14-21 days to assess Cora's response to treatment.

If you haven't already, please schedule that appointment right away. Consistent oral care will maintain Cora's quality of life.

Thank you

We appreciate your dedication to Cora and we're honored to be walking alongside you on this journey.

Cora is a lovely patient. Cora has many fans here at the hospital! Thank you for trusting us with her care.

Please call our hospital at 954-349-5800 with any questions or concerns.

Cardiology Services Report (8792017-14/ECG Screen - Cardiac Screen)

Completed 02/13/23 10:49 AM

Patient Name: Cora Yanes (36224)

Requesting Doctor:	Elizabeth McMorran, DVM, DVM	Species:	Feline	Age:	3Yr 7Mo
Gender:	Female	Breed:	Domestic shorthair	Weight:	10.00 Lb

Is this a Pre-operative / pre-anesthetic ECG?: Yes
Was the patient in right lateral recumbency for this ECG?: Yes
Was this patient ausculted by a veterinarian prior to the ECG today?: Yes
Was an arrhythmia noted on physical exam?: No
Heart Murmur: None
Is a gallop rhythm present?: No
Is patient on an anti-arrhythmic (Sotalol, Atenolol, Diltiazem or Digoxin)?: No
Was atropine or glycopyrrolate administered prior to this ECG?: No
Was the patient sedated prior to this ECG?: Yes
Anxiety/nervousness of this patient during this ECG transmission: Average Anxiety
Was an alpha-2 agonist (Domitor or Xylazine) given prior to this ECG?: No

HEART RATE AND RHYTHM:

Heart Rate: 187 bpm
Rhythm: Sinus

ECG AND CLINICAL ASSESSMENT:

Normal ECG.

ECG waveform's amplitude and duration are within normal limits.

OVERALL RECOMMENDATIONS:

There is no contraindication to general anesthesia or any anesthetic agents based upon this ECG.
