4. Scorecard

Members reviewed the Scorecard goals and identified community programs providing services that are not currently funded by Broward County. The question was raised as to whether the advisory board has the authority to request the Board of County Commission (BOCC) to expand funding for programs already supported by the BOCC such as the Broward Heart Project.

The discussion then shifted to the possibility of collaborating with an existing annual community event to create an “Entertainment Medical Fair” segment. This event would aim to unite partners in assisting community members with scheduling, providing explanations of available services, and offering guidance on follow-up procedures. The vision is to create a “one-stop shop” for preventive

health screenings, connect individuals with resources, and enhance their overall experience by incorporating a musical element. Partners would also have the opportunity to collaborate and design these events while sharing valuable data with participants.
